Hands-On with Summit - Certificates

Certificate Awards

- In order to receive a certificate for participating in this Hands-On with Summit session, you will need to

- Complete these 6 required challenges
  - Access_Ascent_and_Clone_Repo
  - Basic_Workflow
  - OpenMP_Basics
  - MPI_Basics
  - Find_the_Compiler_Flag
  - GPU_Data_Transfers

- Complete any 1 other challenges you'd like.

National Laboratory

Challenge Verification

- In order to show you've completed the challenges, you will need to copy the output file from each challenge into the following directory:

```
cp <path-to-output-file> /gpfs/wolf/trn010/world-shared/<your-user-name>
```

- After your Ascent access ends, we'll check to see how many challenges each of you has completed, where the 7 mentioned will be the target to obtain a certificate.

  Note: For challenges, like MPI_Basics, that will have more than one output file, you only need to turn in any one of the possible files, though you many turn in as many as you like.

  We are checking to see that you tried to learn the information in the challenges, you don't need to have perfect solutions to get credit for that.
